

CO-MANAGED SIEM

All Lines Technology
AllSecure

Dedicated to protecting your business' critical assets from cyber threats.

Our co-managed SIEM services provide an efficient and cost-effective way to manage your organization's security events while providing you with full visibility and control over your security infrastructure.

Our model allows your organization to leverage our expertise and experience to manage your SIEM infrastructure. Our team will work collaboratively with your team to define your security requirements and tailor our services to meet your needs.

- 24x7 Threat Detection – Monitoring and threat hunting on customer networks, endpoints, cloud environments
- 24x7 Threat Analysis – Analyze potential threat and risks
- 24x7 Threat response – Contain the threat before it causes more damage
- Attackers are finding ways around PROTECT defenses, including insider threats
- Unlocks SIEM and 24x7 SOC features without the hefty price tag

Contact us today to learn more about how our co-managed SIEM services can benefit your organization.
