

Cybersecurity Program Assessment

Know your cybersecurity risk and manage it.

At All Lines Technology, we apply real-world CISO expertise and experience to our Cybersecurity Program Assessments. Our assessment process goes beyond the common examination of security controls. We utilize leading industry standards and frameworks aligned to your cyber threats and risks. The results yield a customized cybersecurity program fit to your business and industry including a prioritized initiative plan so you can quickly mitigate your key threats to achieve and maintain optimal risk reduction.

At a high level, our Cybersecurity Program Assessment provides you with:

- An Executive Summary
- Your Current State
- A Prioritized Multi-Year Roadmap to reach maturity
- Key initiatives and tasks to reach your future state

All Lines' cybersecurity assessment program provides you with the most comprehensive view of your security vulnerabilities. The final report will act as your guide toward achieving compliance standards and maximizing your organization's security. Our program assessment starts with the latest industry standards providing you with the most comprehensive view of your current program effectiveness. The final report will act as your guide toward achieving optimal risk reduction in a cost and time effective manner.
