INFRASTRUCTURE IN THE CLOUD

## Scale your infrastructure efficiently and intelligently

All Lines Technology's Cloud Infrastructure removes the on premise operational complexity of your IT infrastructure allowing you to focus on growing your business. IT infrastructure is optimal when it requires minimal management is risk free, and when it can scale intelligently with your evolving business needs. IaaS from ALT turns your IT environment into a strategic function that aligns directly to support your business.

Our IaaS offerings are powered by VMware vCloud Running on enterprise grade hardware. Manage your servers and applications with ease through the self-service portal. We can create customized bundles including managed services, backup services and subscription Microsoft licenses based on your best-fit solution.
